ACTIVE MOISTURE MANAGEMENT

Next-to-skin climate control which transports body moisture from the skin to the fabrics outer surface through specialized moisture wicking yarns.

anti-snag CONSTRUCTION

ANTI-SNAG CONSTRUCTION

Achieved by using specialized yarns that are less likely to break or unravel when pulled or snagged by incorporating specific knitting techniques that reinforce the fabric and reduce the risk of snagging.

DWR WATER RESISTANCE

A polymer coating added to outerwear to provide water resistant protection. This technology also prevents fabric from becoming weighed down by excess moisture.

SUN PROTECTION

Fabrics are treated or constructed using densely woven or knitted fabrics and UV absorbent fibers to reflect UVA and UVB light.
